

Excellent Corrosion Resistance Galvanised Metal Scaffold Tube

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Corrosion Resistance: Excellent
- Bending Radius: >2.5D
- Standard: EN39
- Material: Galvanised Steel
- Elongation: >20%
- Diameter: 48.3mm
- Weight: 6.4kg/m
- Length: 6m

Product Description

Product Description:

Galvanised Metal Scaffold Tube is a special type of steel scaffolding tube that is galvanised for superior corrosion resistance and increased strength. It is an ideal choice for scaffolding applications due to its excellent corrosion resistance, superior elongation of more than 20%, and high tensile strength of 420N/mm². It is available in lengths of 6m, making it easy to assemble and disassemble for various scaffolding projects. Galvanised Steel Scaffolding Tube is the perfect choice for any scaffolding project, as it is highly durable and will not corrode over time. It is also easy to install and can be used for a variety of applications.

Features:

Product Name: Galvanised Scaffold Tube

Standard: EN39

Weight: 6.4kg/m

Yield Strength: 245N/mm²

Tensile Strength: 420N/mm²

Name: Galvanised Scaffold Tube

Galvanised Scaffold Piping

Galvanised Steel Scaffold Tube

Galvanised Steel Scaffolding Tube

Technical Parameters:

Attribute	Value
Name	Galvanised Scaffold Tube
Material	Galvanised Steel
Surface Treatment	Galvanised
Thickness	3.2mm
Weight	6.4kg/m
Length	6m
Yield Strength	245N/mm ²
Tensile Strength	420N/mm ²
Standard	EN39
Corrosion Resistance	Excellent

Applications:

Galvanised Scaffold Piping, also known as Galvanised Metal Scaffold Tube, is produced by Bythai Scaffolding, Model BT01, in China. It is certified by SGS and the price varies from \$5 to \$18. The packaging is usually in bundles and the delivery time is 7-15 days. Payment terms are TT/LC. The supply ability can reach up to 1000tons per month. The bending radius of the Galvanised Metal Scaffolding Tube is >2.5D. The application of this product is mainly scaffolding and it offers excellent corrosion resistance. The weight per meter is 6.4kg/m.

Customization:

Are you looking for a high-quality Galvanised Scaffolding Tube? Bythai Scaffolding offers the perfect solution. Our Galvanised Scaffold Piping is manufactured to the highest standards with a model number of BT01 and certification from SGS. It is made in China and comes with a price range from \$5-\$18. Delivery time is 7-15 days and payment terms are TT/LC. The galvanised metal scaffold tube has a diameter of 48.3mm and a length of 6m, with a yield strength of 245N/mm² and a tensile strength of 420N/mm². The product is suitable for scaffolding and comes in bundles with a supply ability of 1000tons per month.

Packing and Shipping:

Galvanised Scaffold Tube Packaging and Shipping:

Galvanised scaffold tube is typically packaged using shrink wrap or pallet wrap to ensure that the product is held securely in place during shipping. The product will then be shipped in a box or crate, with all necessary paperwork (e.g. bill of lading, packing list, etc.) enclosed. If the final destination is international, then additional paperwork may be required for customs clearance.

FAQ:

What is Galvanised Scaffold Tube?

Galvanised Scaffold Tube is a product of Bythai Scaffolding, with model number BT01. It is certified by SGS and its price ranges from \$5-\$18.

How is Galvanised Scaffold Tube packaged?

Galvanised Scaffold Tube is usually packaged in bundles.

How long is the delivery time for Galvanised Scaffold Tube?

The delivery time for Galvanised Scaffold Tube is about 7-15 days.

What are the payment terms for Galvanised Scaffold Tube?

The payment terms for Galvanised Scaffold Tube is usually TT/LC.

What is the supply ability for Galvanised Scaffold Tube?

The supply ability for Galvanised Scaffold Tube is 1000 tons per month.
