

## 48 Hot Dip Galvanized Scaffolding Steel Tube Stamped Galvanized Scaffold Tube

Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

### Basic Information

- Place of Origin: china
- Brand Name: bythai
- Certification: SGS
- Model Number: BM202
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: L/C

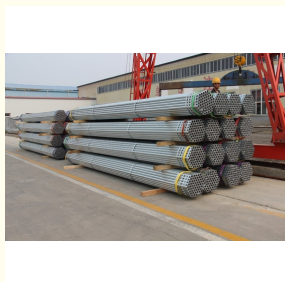

### Product Specification

- Adjustable Length: 3m, 5.8m, 6.0m Or As Your Request
- Bending Radius: >2.5D
- Color: Silver
- Length: 6m
- Outer Diameter: 48.3mm
- Standard: BS EN 39/BS1139
- Thickness: 2.0-4.0mm
- Type: Scaffolding Pipe
- Highlight: Stamped Galvanized Scaffold Tube,  
Hot Dip Galvanized Scaffold Tube,  
Hot Galvanized Scaffolding Steel Tube

## Product Description

### galvanized scaffold tube 48 hot dip galvanized scaffolding steel tube stamped

Name	Size(mm)	Weight(kg)	Surface	Material	Standard
scaffolding tube	48.3*3.2*6000	21.35	HDG	Q235/Q355B	BS1139/EN39
scaffolding tube	48.3*4.0*6000	26.22	HDG	Q235/Q355B	BS1139/EN39
scaffolding tube	48.6*2.4*6000	16.41	HDG/P-G	STK400/STK500	JIS

Galvanizing treatment:

Galvanized steel pipe is often galvanized to improve its corrosion resistance and longevity. The galvanized layer can effectively protect steel pipes from oxidation and corrosion in the environment, making them more suitable for use in projects outdoors and in humid environments.

Advantages:

- Strong and reliable: Galvanized steel pipes provide a solid support structure and are suitable for scaffolding construction to ensure construction safety and stability.
- Durability: Galvanizing treatment increases the durability of steel pipes, extending their service life and reducing maintenance costs.
- Multi-purpose: Suitable for a variety of applications including construction, pipeline, marine and stage construction.
