Galvanized Scaffold Tube 48 for Building Construction

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: $5-$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Name: Galvanised Scaffold Tube
- Thickness: 3.2mm
- Weight: 6.4kg/m
- Material: Galvanised Steel
- Diameter: 48.3mm
- Application: Scaffolding
- Tensile Strength: 420N/mm2
- Yield Strength: 245N/mm2

Product Description

Product Description:

Galvanised Scaffold Tube

The Galvanised Scaffold Tube is a type of scaffold aluminum tube that is specially designed for construction and building purposes. Made from high-quality galvanised steel, this scaffold aluminum tube is known for its durability, strength, and reliability.
The hot dip galvanized scaffolding steel tube is a key component in scaffolding systems, providing a safe and secure platform for workers to carry out their tasks at elevated heights. With a yield strength of 245N/mm2, this scaffold aluminum tube is able to withstand heavy loads and harsh weather conditions.
The Galvanised Scaffold Tube has a thickness of 3.2mm, making it strong enough to support the weight of workers and construction materials. It also has a weight of 6.4kg/m, making it lightweight and easy to handle during installation and dismantling.
This scaffold aluminum tube is coated with a layer of hot dip galvanization, which provides a protective barrier against corrosion and rust. This ensures that the scaffold aluminum tube remains in good condition and has a longer lifespan, making it a cost-effective choice for construction projects.
The Galvanised Scaffold Tube is widely used in various industries such as construction, shipbuilding, oil and gas, and more. It is a popular choice among contractors and builders due to its versatility, strength, and reliability. It is also easy to transport and can be used in both indoor and outdoor environments.
In conclusion, the Galvanised Scaffold Tube is an essential component in scaffolding systems. Its high-quality materials, impressive yield strength, and protective coating make it a reliable and cost-effective choice for construction projects of all sizes. Choose the Galvanised Scaffold Tube for all your scaffolding needs and experience the difference in safety and efficiency.

Technical Parameters:

Product Name	Galvanised Scaffold Tube
Material	Galvanised Steel
Diameter	48.3mm
Thickness	3.2mm
Weight	6.4kg/m
Yield Strength	245N/mm2
Tensile Strength	420N/mm2
Surface Treatment	Galvanised
Application	Scaffolding
Standard	EN39

Applications:

Galvanised Scaffold Tube - Bythai Scaffolding

Product Description

The Galvanised Scaffold Tube, also known as pipe scaffold tube, is a versatile and cost-effective solution for building construction and maintenance. Made of high-quality galvanised steel, it is designed to provide safety, durability, and stability to scaffolding systems.
Brand Name

The Galvanised Scaffold Tube is proudly manufactured by Bythai Scaffolding, a trusted and certified brand in the construction industry.
Model Number

The model number of this product is BT01, which refers to the standard size of the tube - 48.3mm in diameter and 3.2mm in thickness.
Place of Origin

This product is made in China, ensuring high-quality manufacturing standards and competitive pricing.
Certification

The Galvanised Scaffold Tube is certified by SGS, a globally recognized organization for quality and safety standards.
Price

This product is available at a competitive price range of $5-$18 per tube, making it a cost-effective choice for construction projects.
Packaging Details

The Galvanised Scaffold Tube is packaged in bundles, ensuring safe and organized transportation.
Delivery Time

With a supply ability of 1000 tons per month, we can deliver the product within 7-15 days, depending on the order quantity.
Payment Terms

We accept payments through TT (Telegraphic Transfer) and LC (Letter of Credit), providing flexible payment options for our customers.
Material

The Galvanised Scaffold Tube is made of high-quality galvanised steel, which provides superior strength and durability.
Tensile Strength

The tube has a tensile strength of 420N/mm2, ensuring high load capacity and resistance to heavy weights.
Standard

This product meets the EN39 standard, ensuring compatibility with other scaffolding components and systems.

Application

The Galvanised Scaffold Tube is widely used in various construction sites for building, renovation, and maintenance projects. It is also suitable for industrial and commercial applications such as shipbuilding, oil and gas refineries, and power plants.

Features

Easy assembly and disassembly

Can be used in various scaffolding systems

Adjustable height for different construction needs

Corrosion-resistant and weather-resistant

Compatible with other scaffolding components

Reliable and certified for safety and quality

Benefits

Ensures safety and stability on construction sites

High load capacity for heavy-duty applications

Durable and long-lasting, reducing replacement costs

Versatile and compatible with various scaffolding systems

Cost-effective solution for construction projects

Why Choose Bythai Scaffolding?

Bythai Scaffolding is a professional manufacturer and supplier of scaffolding products, providing high-quality and certified products at competitive prices. We have a team of experienced professionals who can assist you in choosing the right products and provide excellent after-sales service. With fast delivery and flexible payment options, we strive to meet our customer's expectations and build a long-term relationship based on trust and quality.

Customization:

Customization Service for Galvanised Scaffold Tube
Brand Name: Bythai Scaffolding
Model Number: BT01
Place of Origin: China
Certification: SGS
Price: $5-$18
Packaging Details: In bundles
Delivery Time: 7-15 days
Payment Terms: TT/LC
Supply Ability: 1000tons per month
Standard: EN39
Yield Strength: 245N/mm2
Weight: 6.4kg/m
Tensile Strength: 420N/mm2
Application: Scaffolding

At Bythai Scaffolding, we understand the importance of customization to meet the diverse needs of our customers. That's why we offer a comprehensive customization service for our Galvanised Scaffold Tube. With our years of experience and expertise in the industry, we are able to provide high-quality customized solutions that cater to your specific requirements.

Our Galvanised Scaffold Tube, model number BT01, is manufactured in China and has been certified by SGS for its quality and durability. With a price range of $5-$18, it offers great value for money. The tubes are packaged in bundles for easy transportation and can be delivered within 7-15 days. We offer flexible payment terms of TT/LC to ensure a hassle-free transaction.

Our supply ability of 1000tons per month ensures that we can meet your large quantity demands without any delay. The scaffold tube is made according to the EN39 standard, with a yield strength of 245N/mm2 and a weight of 6.4kg/m. It also has a high tensile strength of 420N/mm2, making it suitable for heavy-duty applications.

Our Galvanised Scaffold Tube is perfect for tube and coupler scaffolding, providing a safe and sturdy support system for construction projects. It is also widely used in various other applications such as building maintenance, shipbuilding, and industrial maintenance.

Trust Bythai Scaffolding for all your tube scaffolding needs. Contact us now to discuss your customization requirements and get a personalized quote. We are committed to delivering top-notch products and services to our customers worldwide.

Packing and Shipping:

Packaging and Shipping of Galvanised Scaffold Tube

To ensure safe and secure delivery, the Galvanised Scaffold Tube is packaged and shipped in accordance with international packaging and shipping standards. The following steps are taken to ensure the product arrives in perfect condition:

The Galvanised Scaffold Tube is first wrapped in protective packaging material to prevent any scratches or damage during transit.

The wrapped tube is then placed in a sturdy cardboard box to provide additional protection during shipping.

Fragile labels are placed on the packaging to alert the shipping company of the delicate nature of the product.

The packaged tube is then placed on a pallet and shrink-wrapped to provide further stability and protection during transportation.

The pallet is then marked with the necessary shipping information, including the customer's address and contact details.

Once the Galvanised Scaffold Tube is packaged and ready for shipping, it is then loaded onto a secure and reliable freight transport service. Our shipping partners have a proven track record of delivering products safely and on time, ensuring that your order will arrive in perfect condition.

Upon arrival at the destination, the package is carefully unloaded and inspected for any damage. Our team takes every precaution to ensure that the Galvanised Scaffold Tube remains in pristine condition throughout the shipping process.

We strive to provide the best possible packaging and shipping services for our customers, ensuring that your Galvanised Scaffold Tube arrives safely and securely. Thank you for choosing our product.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is Bythai Scaffolding.

Q: What is the model number of this product?

A: The model number of this product is BT01.

Q: Where is this product manufactured?

A: This product is manufactured in China.

Q: Does this product have any certification?

A: Yes, this product is certified by SGS.

Q: What is the price range of this product?

A: The price of this product ranges from $5 to $18.

Other Common Questions:

Q: How is this product packaged?

A: This product is packaged in bundles.

Q: How long is the delivery time for this product?

A: The delivery time for this product is 7-15 days.

Q: What are the payment terms for this product?

A: The payment terms for this product are TT/LC.

Q: What is the supply ability for this product?

A: The supply ability for this product is 1000 tons per month.
