

3.2mm Galvanised Scaffold Tube For High Performance Scaffolding

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Name: Galvanised Scaffold Tube
- Diameter: 48.3mm
- Tensile Strength: 420N/mm²
- Weight: 6.4kg/m
- Yield Strength: 245N/mm²
- Material: Galvanised Steel
- Surface Treatment: Galvanised
- Standard: EN39
- Highlight: **Corrosion Resistant Scaffold Tube, 3.2mm Galvanised Scaffolding Tube, 420N/mm² Galvanised Scaffold Tube**

Product Description

Product Description:

Galvanised Scaffold Tube

The Galvanised Scaffold Tube is a type of seamless pipe that is specifically designed and manufactured for use in scaffolding applications. It is known for its high strength, durability, and resistance to corrosion, making it a popular choice among construction professionals.

Application

The Galvanised Scaffold Tube is widely used in the construction industry as a key component in scaffolding systems. It provides a stable and secure platform for workers to work on while building or repairing structures such as buildings, bridges, and towers.

Key Features

Tensile Strength: The Galvanised Scaffold Tube has a tensile strength of 420N/mm², making it strong enough to support heavy loads and withstand harsh weather conditions.

Standard: This product is produced in accordance with the EN39 standard, ensuring its quality and safety for use in scaffolding systems.

Thickness: The Galvanised Scaffold Tube has a thickness of 3.2mm, providing the necessary strength and stability for scaffolding structures.

Surface Treatment: The Galvanised Scaffold Tube is treated with a galvanisation process, which involves dipping the tube in molten zinc to create a protective layer that prevents rust and corrosion. This extends the lifespan of the product and makes it suitable for use in both indoor and outdoor settings.

Benefits

High strength and durability

Corrosion resistance

Easy to install and dismantle

Cost-effective alternative to other scaffolding materials

Suitable for various scaffolding applications

Scaffolding Supplier

If you are in need of scaffolding tubes galvanized and are looking for a reliable supplier, look no further than us. We offer high-quality Galvanised Scaffold Tubes at competitive prices. Our products are manufactured to meet the EN39 standard and undergo strict quality control to ensure their safety and durability. Contact us today to get a scaffolding tube price quote and to learn more about our products and services.

Technical Parameters:

| Technical Parameters | Values |
|----------------------|---|
| Standard | EN39 |
| Application | Scaffolding |
| Yield Strength | 245N/mm2 |
| Weight | 6.4kg/m |
| Name | Galvanised Scaffold Tube |
| Material | Galvanised Steel |
| Surface Treatment | Galvanised |
| Diameter | 48.3mm |
| Thickness | 3.2mm |
| Tensile Strength | 420N/mm2 |
| Keywords | seamless pipe, hot dip galvanized scaffolding steel tube, steel tubes for scaffolding |

Applications:

Galvanised Scaffold Tube - The Perfect Solution for Safe and Durable Scaffolding Systems

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

The Galvanised Scaffold Tube, manufactured by Bythai Scaffolding, is a high-quality and reliable product that is widely used in the construction industry. Made from seamless pipe, this scaffolding steel tube is known for its strength, durability, and versatility. With its excellent quality and competitive price, it has become the top choice for many builders and contractors.

Application:

The Galvanised Scaffold Tube is an essential component in any scaffolding system. It is used to provide support and stability for workers and equipment during construction, renovation, and maintenance projects. It is suitable for various building types, including residential, commercial, and industrial structures.

Scene 1: Construction Site

At a construction site, the Galvanised Scaffold Tube is used to create a temporary structure that allows workers to access different levels of a building. It is commonly used for tasks such as painting, plastering, and bricklaying. Its high tensile strength of 420N/mm² and yield strength of 245N/mm² ensures the safety of workers and the stability of the structure.

Scene 2: Building Maintenance

During building maintenance, the Galvanised Scaffold Tube serves as a sturdy platform for workers to carry out repairs, inspections, and cleaning. Its galvanised surface treatment provides excellent corrosion resistance, making it suitable for outdoor use and protecting it from the elements.

Key Features:

Safety: The Galvanised Scaffold Tube is designed to meet safety standards and regulations, providing a secure working environment for construction workers.

Durability: Made from high-quality materials and coated with a galvanised surface treatment, this scaffolding tube can withstand harsh weather conditions and heavy loads, ensuring its longevity.

Versatility: With its various sizes and lengths, the Galvanised Scaffold Tube can be used for a wide range of applications, making it a versatile and cost-effective choice for construction projects.

Easy Installation: The seamless design of the tube allows for quick and easy installation, saving time and labor costs for construction companies.

Overall, the Galvanised Scaffold Tube from Bythai Scaffolding is a reliable and essential product for any construction project. Its superior quality, safety, and durability make it the perfect solution for scaffolding systems. With its competitive price and availability, it is a must-have for any construction company looking for a cost-effective and efficient solution. Choose the Galvanised Scaffold Tube and build with confidence.

Customization:

Galvanised Scaffold Tube Customisation Service

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

Diameter: 48.3mm

Name: Galvanised Scaffold Tube

Yield Strength: 245N/mm²

Standard: EN39

Thickness: 3.2mm

At Bythai Scaffolding, we offer customisation services for our hot dip galvanized scaffolding steel tube. Our steel and pipe products are manufactured in China and have received SGS certification for their quality and durability. With a price range of \$5-\$18, our galvanised scaffold tubes are a cost-effective solution for your construction needs.

In order to meet your specific requirements, we can customise the packaging details to be in bundles, ensuring safe and efficient transportation. Our delivery time is 7-15 days, and we accept payment through TT or LC for your convenience. With a supply ability of 1000tons per month, you can trust us to meet your project deadlines.

Our Galvanised Scaffold Tube, with a diameter of 48.3mm and yield strength of 245N/mm², is made according to the EN39 standard. The thickness of the tube is 3.2mm, providing strong support for your scaffolding needs.

Choose Bythai Scaffolding for our top-quality, customisable hot dip galvanized scaffolding steel tube. Our steel and pipe products are trusted and used by construction professionals worldwide. Contact us now to discuss your customisation requirements.

Packing and Shipping:

Packaging and Shipping

Galvanised Scaffold Tube is carefully packaged to ensure its safe transportation and delivery to our valued customers. Each tube is wrapped with protective material and then placed into sturdy cardboard boxes or wooden crates, depending on the quantity ordered. We offer various shipping options to meet the needs of our customers, including express delivery and standard shipping. Our team works closely with trusted shipping partners to ensure timely and efficient delivery of our products.

For international orders, we adhere to all necessary regulations and requirements for safe and legal transportation. This may include additional packaging materials and documentation.

Upon delivery, our customers can expect their Galvanised Scaffold Tubes to be in excellent condition, ready to be used for their construction needs.
