Construction Steel Prop with Standard Strength and Durability

Our Product Introduction

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding steel prop
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Delivery Time: 10-25

Product Specification

- Weight: Heavy
- Function: Support
- Size: Standard
- Usage: Construction
- Height: Adjustable
- Color: Silver
- Packaging: Container
- Feature: Durable

Product Description

Product Description:

Adjustable Steel Prop

Product Overview

The Adjustable Steel Prop is a crucial building support for construction projects. It is designed to provide reliable and durable support for building pillars, ensuring the safety and stability of the entire structure. This product is made of high-quality steel and treated with hot-dip galvanization, making it resistant to corrosion and rust. It is a cost-effective solution to support heavy loads and maintain the structural integrity of buildings.

Adjustable Height

One of the key features of the Adjustable Steel Prop is its adjustable height. This allows for flexibility in construction projects, as the prop can be easily adjusted to the desired height. It eliminates the need for multiple props in different sizes, making it a convenient and cost-effective solution for building support.

HDG Surface Treatment

Hot-dip galvanization is a process of coating steel with a layer of zinc to protect it from corrosion and rust. The Adjustable Steel Prop is treated with this surface treatment, making it highly durable and long-lasting. It can withstand harsh environmental conditions and is suitable for use in different types of construction projects.

Container Packaging

To ensure easy transportation and storage, the Adjustable Steel Prop is packaged in containers. This makes it convenient to transport to different construction sites and to store when not in use. It also protects the props from damage during transportation, ensuring that they arrive in perfect condition.

Usage in Construction

The Adjustable Steel Prop is specifically designed for use in construction projects. It is a reliable and sturdy support for building pillars, providing stability and safety to the entire structure. It is suitable for use in various types of construction, including residential, commercial, and industrial buildings.

Durable and Cost-effective

The Adjustable Steel Prop is a durable and cost-effective solution for building support. It is made of high-quality steel, treated with hot-dip galvanization, and designed to withstand heavy loads and harsh environmental conditions. This makes it a long-lasting and cost-effective investment for construction projects.

Keywords

steel props price, building support, building pillars, adjustable steel prop, HDG, container packaging, construction, durable

Technical Parameters:

Product Name	Adjustable Steel Prop
Size	Standard
Packaging	Container

Surface Treatment	HDG (Hot Dip Galvanized)
Weight	Heavy
Feature	Durable
Function	Support
Height	Adjustable
Usage	Construction
Color	Silver
Material	Steel
Keywords	steel prop jack, building support, steel props for concreting

Applications:

Adjustable Steel Prop - Ideal for Construction Site Support

Brand Name: Scaffolding Steel Prop

Place of Origin: China Tianjin

Minimum Order Quantity: 1000

Price: $4.5-8.5

Delivery Time: 10-25 days

Size: Standard

Weight: Heavy

Packaging: Container

Surface Treatment: HDG

The scaffolding steel prop tripod is an essential tool for any construction site. It is designed to provide sturdy support for buildings and structures during construction. Made with high-quality steel, this adjustable prop is built to withstand heavy loads and ensure the safety of workers and the overall construction site.
Perfect for Various Construction Applications

The scaffolding steel prop is suitable for a wide range of construction applications, including building support, formwork, and shoring. It is commonly used in high-rise buildings, bridges, tunnels, and other large-scale projects. This versatile prop is a must-have for any construction site.
Adjustable Height for Flexibility

One of the key features of the scaffolding steel prop is its adjustable height. It can be easily adjusted to fit the specific needs of the project. This allows for greater flexibility in construction and helps ensure the proper support and stability of the structure.
Heavy-Duty and Sturdy Construction

The scaffolding steel prop is built to handle heavy loads and withstand harsh working conditions. Its strong and sturdy construction makes it ideal for supporting heavy concrete slabs and other building materials. This prop is designed to last, providing reliable support for all your construction needs.
Ensures Safety on the Construction Site

Safety is a top priority on any construction site. The scaffolding steel prop is designed with safety in mind, providing a secure and stable base for workers to perform their tasks. Its heavy-duty construction and adjustable height make it a reliable and safe choice for any construction project.
Easy to Use and Transport

The scaffolding steel prop is designed for ease of use. It can be quickly set up and adjusted as needed, saving time and effort for workers. Its compact design also makes it easy to transport and store, making it a convenient tool for any construction site.
Invest in the scaffolding steel prop for your construction projects and experience its many benefits. Its adjustable height, heavy-duty construction, and safety features make it the perfect choice for supporting buildings and structures on any construction site.

Customization:

Adjustable Steel Prop Customization Service

Brand Name: Scaffolding Steel Prop
Place of Origin: China Tianjin
Minimum Order Quantity: 1000
Price: $4.5-$8.5
Delivery Time: 10-25 days
Packaging: Container
Material: Steel
Function: Support
Weight: Heavy
Feature: Durable
Our adjustable steel prop, also known as steel props for concreting, is the perfect solution for supporting structures during construction. Made from high-quality steel and designed for heavy-duty use, our steel props are built to last and provide reliable support for your projects.
Our steel props are manufactured in China Tianjin, ensuring top-notch quality and competitive prices. With a minimum order quantity of 1000, we are able to cater to both small and large construction projects.
We also offer customization services for our steel props, including spray painting in your desired color for easy identification and branding. This not only adds an aesthetic touch, but also increases safety on the construction site.
Our steel props for concreting are available at a price range of $4.5-$8.5, depending on the quantity and customization requirements. We offer fast delivery within 10-25 days, ensuring that your construction project stays on schedule.
For packaging, our steel props are carefully packed in containers to ensure safe and efficient transportation to your construction site.

Choose our adjustable steel prop for its durability, strength, and reliability in supporting your construction structures.

Packing and Shipping:

Adjustable Steel Prop

Packaging and Shipping

The Adjustable Steel Prop is packaged in sturdy cardboard boxes to ensure safe transportation. Each prop is individually wrapped in plastic to protect it from any potential damage during shipping.
For smaller orders, the props are shipped via standard courier services, while larger orders are shipped via freight. The props are securely stacked and strapped onto pallets for ease of loading and unloading.
Customers can choose between air, land, or sea transportation, depending on their location and urgency of delivery. Our team works closely with trusted shipping partners to ensure timely and efficient delivery of our products.
Upon arrival, customers are advised to inspect their shipment for any damages and report them to us immediately. We will work with our shipping partners to resolve any issues and ensure customer satisfaction.
