

EN39 Standard Scaffolding Steel Tube 6.4kg/M For Construction Industry

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Tensile Strength: 420N/mm2
- Name: Galvanised Scaffold Tube
- Yield Strength: 245N/mm2
- Surface Treatment: Galvanised
- Diameter: 48.3mm
- Standard: EN39
- Material: Galvanised Steel
- Weight: 6.4kg/m
- Highlight: **EN39 Standard Scaffolding Steel Tube,
Scaffolding Steel Tube 6.4kg/M,
Construction Industry Galvanised Scaffold Tube**

Product Description

EN39 Standard Scaffolding Steel Tube 6.4kg/M For Construction Industry

Product Description:

Galvanised Scaffold Tube

The Galvanised Scaffold Tube is a type of steel tube that is commonly used in the construction industry for scaffolding purposes. It is known for its durability, strength, and resistance to corrosion, making it the ideal choice for supporting structures in construction sites. The tube has a diameter of 48.3mm, making it suitable for various scaffolding applications. It is made from galvanised steel, which is a type of steel that has been coated with a layer of zinc to protect it from rusting and corrosion. This galvanising process gives the tube its signature silver-grey appearance, making it easily recognizable on construction sites.

The Galvanised Scaffold Tube is designed to be strong and able to withstand heavy loads. It has a weight of 6.4kg/m, making it light enough for easy handling and transportation, yet sturdy enough to support workers and construction materials. This makes it a popular choice for scaffolding systems in both residential and commercial construction projects.

One of the major advantages of using Galvanised Scaffold Tubes is their versatility. They can be used in a variety of scaffolding configurations, such as single and double scaffolding, birdcage scaffolding, and cantilever scaffolding. They are also compatible with various scaffolding components, such as couplers, clamps, and brackets, allowing for easy and secure assembly.

In addition to their use in scaffolding, Galvanised Scaffold Tubes have other applications in the construction industry. They can be used as temporary handrails, guardrails, and barriers, providing a safe working environment for construction workers. They can also be used as supports for formwork and shoring systems, making them essential in the construction of concrete structures.

Furthermore, Galvanised Scaffold Tubes are known for their longevity. The galvanising process not only protects the steel from corrosion but also adds an extra layer of strength, making the tubes durable and able to withstand harsh weather conditions. This makes them a cost-effective choice for construction companies, as they do not need to be replaced frequently.

In conclusion, the Galvanised Scaffold Tube is a crucial component in the construction industry. Its strength, durability, and versatility make it an essential tool for scaffolding and other construction applications. With its distinctive silver-grey appearance, it is easily identifiable on construction sites and has become synonymous with scaffolding and other temporary structures.

Technical Parameters:

Technical Parameters	Values
Standard	EN39
Name	Galvanised Scaffold Tube
Material	Galvanised Steel
Diameter	48.3mm
Thickness	3.2mm
Surface Treatment	Galvanised
Weight	6.4kg/m
Yield Strength	245N/mm2
Tensile Strength	420N/mm2
Application	Scaffolding

Applications:

Galvanised Scaffold Tube - Bythai Scaffolding

Introduction

The Galvanised Scaffold Tube, also known as tube and coupler scaffolding, is a crucial component in construction sites. It is manufactured by Bythai Scaffolding, a trusted brand from China with SGS certification, ensuring high-quality products. With a yield strength of 245N/mm2 and a thickness of 3.2mm, our Galvanised Scaffold Tubes have a high load-bearing capacity and are suitable for various applications in the construction industry.

Features and Benefits

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

Yield Strength: 245N/mm2

Application: Scaffolding

Thickness: 3.2mm

Tensile Strength: 420N/mm2

Weight: 6.4kg/m

Our Galvanised Scaffold Tubes offer the following features and benefits:

Easy to assemble and disassemble, providing convenience and saving time and effort on construction sites.

Highly durable and versatile, suitable for various construction projects.

Cost-effective solution compared to other scaffolding systems.

Reliable and of high-quality, ensuring safety and stability for workers.

Adjustable in length, making it suitable for different building heights.

Lightweight, making it easy to transport and handle.

Weather-resistant and corrosion-resistant, making it suitable for outdoor use.

Can withstand heavy loads, providing a secure support structure for workers.

Long-lasting and economic, reducing the need for frequent replacements.

Applications and Usage

The Galvanised Scaffold Tube is widely used in the construction industry for various applications, such as:

Commercial buildings

Residential buildings

Industrial buildings

Bridges and tunnels

Shipyards

Oil refineries

Power plants

Maintenance and repair work

Renovation projects

Event and stage construction

It is also suitable for scaffolding rental companies, providing an efficient and reliable solution for their clients.

Conclusion

In conclusion, Bythai Scaffolding's Galvanised Scaffold Tube is an essential and reliable component in the construction industry. With its high strength and durability, it provides a safe and stable support structure for workers while being cost-effective and versatile. Trust in Bythai Scaffolding for all your scaffolding needs.

Customization:

Bythai Scaffolding - Galvanised Scaffold Tube Customization Service

Product Description

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

Diameter: 48.3mm

Name: Galvanised Scaffold Tube

Thickness: 3.2mm

Material: Galvanised Steel

Weight: 6.4kg/m

Product Features

High quality galvanised steel material for durability and corrosion resistance.

Compliant with BS1139 scaffolding tube standards for safety and reliability.

Available in a variety of sizes and lengths to meet different project needs.

Customizable with your preferred brand name and model number.

Competitive price range of \$5-\$18 per tube.

In bundles packaging for easy transportation and storage.

Fast delivery time of 7-15 days to meet project deadlines.

Flexible payment terms of TT/LC for convenience.

Strong supply ability of 1000tons per month to meet high demand.

Why Choose Bythai Scaffolding?

As one of the leading scaffold tube manufacturers in China, Bythai Scaffolding is committed to providing high quality products and excellent customization services to meet the specific needs of our clients. Our galvanized scaffolding pipe tubes are made with the highest quality materials and are compliant with industry standards for safety and reliability. With our competitive pricing and strong supply ability, we are the perfect choice for all your scaffolding needs.

Packing and Shipping:

Galvanised Scaffold Tube - Packaging and Shipping

Our Galvanised Scaffold Tube is carefully packaged to ensure safe delivery to your doorstep. We understand the importance of protecting your investment and have taken great care in designing our packaging to withstand any handling during transport.

Packaging Details:

Each tube is individually wrapped in a layer of protective plastic.

Multiple tubes are then bundled together and secured with strong plastic strapping.

The bundled tubes are then placed in a sturdy cardboard box for added protection.

The box is sealed with strong packing tape to prevent any damage during shipping.

Shipping Methods:

We offer various shipping options to suit your needs and budget. Our preferred shipping partners are well-known and reliable companies to ensure timely and safe delivery.

Standard Ground Shipping: This option is best for smaller orders and typically takes 3-5 business days for delivery.

Expedited Shipping: For urgent orders, we offer expedited shipping options at an additional cost.

International Shipping: We ship our products worldwide. Please contact us for a quote on international shipping rates.

Shipping Documents:

For easy customs clearance, we provide all the necessary shipping documents, including commercial invoices, packing lists, and certificates of origin. These documents will be included in your package or emailed to you upon request.

Tracking Your Order:

Once your order has been shipped, we will provide you with a tracking number so you can monitor the progress of your delivery.

Thank you for choosing our Galvanised Scaffold Tube. We strive to provide you with the best quality products and hassle-free shipping experience.
