# Scaffolding Parts Scaffold Ladder Frame Scaffolding Material Cross Brace Shoring Towers

Our Product Introduction

## Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM205
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: TT/TC

## Product Specification

- Shipping Origin: China
- Color: Steel/Spray Plastic
- Size: Customized
- Load Capacity: High
- Arrival Time: 10-15
- Material: Q235
- Highlight: **Shoring Towers Scaffold Ladder Frame**, **Cross Brace Scaffold Ladder Frame**, **Scaffolding Shoring Towers**

## Product Description

### Product Description:

Frame System Scaffolding

The Frame System Scaffolding is a versatile and efficient scaffolding system designed for use in construction projects. With its strong and durable structure, this system provides a safe and stable working platform for workers to carry out their tasks. It is a popular choice among contractors and construction companies due to its high load capacity and customizable features.

Portal Frame Shoring System

The Frame System Scaffolding is also known as the Portal Frame Shoring System, as it is designed with a unique portal frame structure that provides maximum stability and support. This system is made of high-quality Q235 steel, which ensures its strength and durability. The portal frame design also allows for quick and easy assembly, making it an ideal choice for time-sensitive construction projects.

Customized Size

One of the key features of the Frame System Scaffolding is its customizable size. This means that it can be adapted to fit any construction site, regardless of its shape or size. This feature makes it a versatile and flexible option for various types of construction projects. Whether it is a small residential building or a large commercial complex, the Frame System Scaffolding can be customized to meet the specific requirements of the project.

High Load Capacity

The Frame System Scaffolding is designed to have a high load capacity, making it suitable for heavy-duty construction work. It can support the weight of multiple workers, tools, and materials, ensuring a safe and efficient working environment. This feature makes it an ideal choice for projects that require a large amount of scaffolding, such as high-rise buildings, bridges, and industrial structures.

Steel/Spray Plastic Color

The Frame System Scaffolding is available in two different colors - steel and spray plastic. The steel color option gives the scaffolding a classic and industrial look, while the spray plastic option adds a touch of modernity and vibrancy. This feature allows for customization based on personal preference or to match the aesthetic of the construction site.

H Scaffold System

The Frame System Scaffolding is also referred to as the H Scaffold System due to its unique H-shaped design. This design not only provides maximum stability but also allows for easy movement and transportation of the scaffolding. This feature makes it suitable for projects that require frequent relocation of scaffolding, such as bridge construction or building maintenance.

Scaffolding System for Construction

The Frame System Scaffolding is specifically designed for use in construction projects. Its strong and durable structure, high load capacity, and customizable features make it a reliable and efficient scaffolding system for various construction tasks. It is a cost-effective solution for contractors and construction companies, ensuring a safe and productive working environment for their workers.

Conclusion

The Frame System Scaffolding is a versatile and efficient scaffolding system that offers customizable size, high load capacity, and a choice of steel or spray plastic color. Its unique portal frame and H scaffold design make it a stable and easy-to-use option for construction projects. With its arrival time of 10-15 days and material of Q235 steel, the Frame System Scaffolding is a reliable and cost-effective choice for any construction site.

## Technical Parameters:

| Attribute | Value |
|---|---|
| Arrival time | 10-15 |
| Material | Q235 |
| Load Capacity | High |
| Color | Steel/Spray Plastic |
| Shipping origin | China |
| Size | Customized |
| Frame Upright | Q235 steel material, available in different sizes and lengths |
| Frame Scaffolding System | Consists of frame uprights, cross braces, and planks, easy to assemble and disassemble, suitable for various construction projects |
| Scaffold Frame | Stable and sturdy structure, can support heavy loads and provide a safe working platform for workers |
| Construction Scaffolding | Ideal for building, maintenance, and renovation work, offers flexibility and versatility in use |

## Applications:

American Frame Design: Our scaffolding follows the American frame design which is known for its stability and strength.
Portal Frame Shoring: The portal frame shoring provides additional support and ensures the scaffolding can withstand heavy loads.
Heavy Duty Steel Frame: Our system scaffolding is made of high-quality Q235 steel, making it strong and durable.
Customizable Size: We understand that every project has different requirements, which is why we offer customized sizes to meet your specific needs.
High Load Capacity: Our scaffolding has a high load capacity, making it suitable for heavy-duty applications.
Steel/Spray Plastic Color: Our scaffolding is available in both steel and spray plastic colors, providing you with options to choose from.
Packaging and Delivery
Our scaffolding is packed in bundles and delivered within 10-15 days after receiving the order. We offer flexible payment terms, including

TT/TC, for the convenience of our customers.
Price

The price of our BM205 Frame System Scaffolding ranges from  4.5-8.5, depending on the size and quantity ordered.
Why Choose Bythai BM205 Frame System Scaffolding?

SGS Certified: Our scaffolding is certified by SGS, ensuring it meets the highest quality standards.

Durable: Made of high-quality Q235 steel, our scaffolding is built to last and can withstand heavy loads.

Easy to Assemble: Our scaffolding is designed for easy assembly, saving you time and effort on the job site.

Safe: With its American frame design and portal frame shoring, our scaffolding provides a safe working environment for workers.

Cost-effective: Our scaffolding offers a cost-effective solution for your scaffolding needs without compromising on quality.

Versatile: Our scaffolding can be used in a variety of industries and applications, making it a versatile choice for your projects.
