Product Description

Product Description:

Scaffolding Ladders - Product Overview

Introducing Scaffolding Ladders - the perfect solution for all your construction and maintenance needs. Made from high quality galvanized steel, our ladders are built to last and can withstand a load capacity of 150kg. With a step height of 30cm and a step width of 50cm, our ladders provide safe and steady access to any elevated area, making them an essential tool for any project.

Galvanized Steel Ladder: Our ladders are made from galvanized steel, making them corrosion resistant and durable for long-term use.

Adjustable: Our ladders are adjustable in height, allowing you to easily reach different levels and complete your tasks efficiently.

Lightweight: Despite being made from steel, our ladders are surprisingly lightweight, making them easy to transport and maneuver on the job site.

Durable: Our ladders are built to withstand heavy-duty use, providing a stable and secure platform for you to work on.

Versatile: Whether you're working on a construction site, painting a house, or doing maintenance work, our ladders are versatile enough to meet all your needs.

Available in a sleek silver color, our Scaffolding Ladders are not only functional, but also aesthetically pleasing. With a size of 3m, our ladders provide ample height for most projects. Invest in our Scaffolding Access Ladders today and make your work easier and safer! Shop Now

Features:

Product Name: Scaffolding Ladders

Load Capacity: 150kg

Step Width: 50cm

Size: 2-3m

Material: Aluminum/HDG

Step Height: 30cm

Scaffolding Folding Ladders

Scaffolding Climbing Ladders

Aluminum ladder

HDG ladder

Applications:

Our Scaffolding Ladders are suitable for a variety of applications, including:

Building construction and maintenance

Home renovation and repair

Painting and decorating

Window cleaning

Warehouse and industrial use

Key Features:

Ladder with hook: Our Scaffolding Ladders come with a hook on the top, allowing for easy attachment to scaffolding structures.

Scaffolding Folding Ladders: Our ladders are designed to be foldable, making them easy to transport and store.

Aluminum Ladder: Made from high-quality aluminum, our ladders are lightweight and corrosion-resistant.

HDG Ladder: Our ladders are also available in HDG (hot-dip galvanized) for added durability and resistance to harsh weather conditions.

3m Ladder: With a height of 3m, our ladders are suitable for reaching most standard building heights.

Lightweight and Heavy Duty: Despite being lightweight, our ladders are also heavy duty and can support a maximum weight of 150kg.

Usage Scenario:

One of our clients, a construction company, recently used our Scaffolding Ladders for their renovation project. They needed a ladder that could easily attach to their existing scaffolding structure and be moved around the site. Our ladders were the perfect solution as they could be easily folded and transported to different areas of the site. The lightweight aluminum material also made it easy for their workers to carry the ladder and set it up wherever needed. The HDG option was also ideal for them as the project was located in an area with harsh weather conditions. They were able to complete the project on time and with great efficiency, thanks to our Scaffolding Ladders.

Ordering Information:

Our Scaffolding Ladders, model BM224, can be ordered in minimum quantities of 1000. They are packaged in containers and have a delivery time of 10-25 days. We offer a 2-year warranty for our ladders, ensuring our customers' satisfaction and confidence in our product.

Choose the bythai BM224 Scaffolding Ladders for your next project and experience the convenience and safety it provides. Contact us now to place your order!
