

EN39 Standard Galvanised Steel Scaffold Tube for Scaffolding Construction

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS ISO
- Model Number: BT201
- Minimum Order Quantity: 1000
- Price: \$10-\$85
- Packaging Details: In bundles
- Delivery Time: 10-15 days
- Payment Terms: TT/TC
- Supply Ability: 1000tons per month

Product Specification

- Standard: EN39
- Yield Strength: 245N/mm²
- Surface Treatment: Galvanised
- Thickness: 3.2mm
- Application: Scaffolding
- Tensile Strength: 420N/mm²
- Name: Galvanised Scaffold Tube
- Material: Galvanised Steel
- Highlight: **Steel Galvanised Scaffold Tube, Construction Galvanised Scaffold Tube, EN39 Galvanised Scaffold Tube**

Product Description

Features:

Product Name: Galvanised Scaffold Tube

Standard: EN39

Name: Galvanised Scaffold Tube

Weight: 6.4kg/m

Yield Strength: 245N/mm2

Thickness: 3.2mm

Material: Steel tubes

Structure: Seamless pipe

Finish: Galvanized scaffolding pipe tube

Technical Parameters:

Product Name:	Galvanised Scaffold Tube
Material:	Galvanised Steel
Surface Treatment:	Galvanised
Standard:	EN39
Diameter:	48.3mm
Thickness:	3.2mm
Yield Strength:	245N/mm2
Tensile Strength:	420N/mm2
Weight:	6.4kg/m
Application:	Scaffolding

Applications:

The Galvanised Scaffold Tube is versatile and can be used in various occasions and scenarios. Steel tubes are widely used in the construction industry, and this product is no exception. It is perfect for constructing and providing support for scaffolding structures. The Galvanised Scaffold Tube can be used in various construction sites, such as high-rise buildings, bridges, and tunnels. This pipe scaffold tube is particularly useful in situations where the structure needs to be erected quickly and efficiently.

The Galvanised Scaffold Tube is also suitable for use in event management. The tube can be used to construct temporary staging and seating platforms for outdoor events. The product can also be used in the entertainment industry to build sets and props for movies or theater productions.

The Galvanised Scaffold Tube can also be used in the transportation industry. Steel tubes are used to construct trailers and other heavy-duty vehicles. This product can be used to construct the frames of trailers, providing a sturdy and durable base for the vehicle.

The Galvanised Scaffold Tube has a tensile strength of 420N/mm2 and a yield strength of 245N/mm2. These properties make it a reliable and safe product. Bythai Scaffolding ensures that the product is of the highest quality and meets all the necessary standards. The product is also designed to last, providing a long-lasting solution for all construction needs.
