

Origin Scaffolding Ring Lock For Hot Dip Galvanized Construction

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: Tianjin China
- Brand Name: Bythai
- Certification: SGS ISO
- Model Number: BT203
- Minimum Order Quantity: 1000
- Price: 10.8-85.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Product Name: Ringlock System
- Material: Q235 Steel
- Application Scenarios: Architecture
- Shipping Origin: China
- Surface Treatment: Hot-dip Galvanized
- Design Style: Industrial
- Application: Building
- Highlight: Construction Origin Scaffolding Ring Lock, Origin Scaffolding Ring Lock, Hot Dip Galvanized Scaffolding Ring Lock

Product Description

Features:

Product Name: Ringlock System Scaffolding

Surface Treatment: Hot-dip Galvanized

Shipping origin: China

Warranty: 2 Years

Material: Q235 Steel

Application scenarios: Architecture

Features:

Layher scaffolding design for quick and easy assembly

Ringlock rosette connections for secure and stable structure

Corrosion-Resistant Ringlock for long-lasting durability

Technical Parameters:

Product Name	Versatile Ringlock Scaffold
Material	Q235 Steel
Design Style	Innovative Ring Lock Design
Application Scenarios	Architecture
Place of Origin	Tianjin, China
Shipping Origin	China
Warranty	2 Years
Application	Building
Surface Treatment	Hot-dip Galvanized
Special Features	Ringlock Rosette

Applications:

The Ringlock System Scaffolding is made of Q235 steel, which is a strong and durable material that can withstand various weather conditions. The hot-dip galvanized surface treatment increases the lifespan of the product and protects it from rust, corrosion, and other types of damage.

Ringlock ledger head is one of the essential components of the Bythai BT203 hot dip galvanized ringlock system scaffolding. It provides a secure connection between the vertical and horizontal members of the scaffolding, ensuring the stability and safety of the structure.

Ringlock scaffold supplier offers a complete range of ringlock ledger heads that are compatible with different sizes and types of scaffolding.

The product application occasions and scenarios of the Bythai BT203 hot dip galvanized ringlock system scaffolding are diverse. It is commonly used in the construction industry for building temporary structures such as bridges, tunnels, dams, and high-rise buildings. It is also suitable for maintenance, repair, and renovation projects that require access to difficult-to-reach areas.

As a Ringlock scaffold supplier, Bythai provides high-quality products that meet the highest industry standards. The hot dip galvanized ringlock system scaffolding is a reliable and cost-effective solution for any construction project that requires a sturdy and safe support structure.

Customization:

With a minimum order quantity of 1000, the Ringlock Scaffold Connector is hot-dip galvanized for added durability. The price ranges from 10.8 to 85.5 per unit and comes packaged in bundles for easy transportation.

Shipping from China, the delivery time for your customized order is 10-15 days, with payment terms of TT/TC. Perfect for building applications, enhance your construction needs with Bythai's Ringlock System Scaffolding.
