High Flexibility Steel Speed Lock America Ladder Frame System for Easy Assembly

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BT04

Product Specification

- Features: Easy To Assemble And Disassemble
- Stability: High
- Surface Treatment: Powder Coating
- Safety: High
- Durability: High
- Weight: Lightweight
- Load Capacity: High
- Material: Steel
- Size: Customized
- Usage: Indoor/Outdoor
- Flexibility: High
- Customization: Available
- Application: Construction

Product Description

Product Description:

The Low Price Q195 Speed Lock Easy Assemble America Frame System offers a cost-effective solution for your construction projects. Made from Q195 steel, this system ensures superior strength and durability. The Speed Lock feature allows for quick and easy assembly, saving time and labor costs. Ideal for fast setup projects, this frame system is designed to provide stability and reliability. Its high-quality materials make it a perfect choice for various construction applications, ensuring long-lasting performance. Optimize your construction process with this affordable and efficient frame system.

Key Features:

Factory Direct: Sourced directly from our factory, this mason frame ensures high quality and competitive pricing. Our rigorous manufacturing processes and quality control standards guarantee a reliable product that meets international standards.
Q235 Steel: Constructed from premium Q235 steel, this mason frame boasts exceptional strength and durability. Q235 steel is renowned for its robust properties, making it ideal for heavy-duty construction applications where reliability and performance are paramount.
DROP LOCK Mechanism: The innovative DROP LOCK system provides a quick and secure assembly process, enhancing safety and efficiency on the job site. This user-friendly mechanism ensures that the frame remains stable and safe during use, reducing setup time and labor costs.
Versatility: Designed for versatility, our mason frame is suitable for a wide range of construction projects, from residential buildings to commercial structures. Its adaptable design allows it to be used in various applications, providing reliable support and stability.
Low Maintenance: With low maintenance requirements, this mason frame offers long-term cost savings and hassle-free use. The high-quality materials and construction reduce the need for frequent repairs or replacements, ensuring sustained performance over time.
Made in China: Proudly made in China, our mason frame benefits from advanced manufacturing techniques and stringent quality control measures. As a leading producer of scaffolding solutions, we leverage our expertise to deliver a product that exceeds expectations.

Features:

Product Name: Frame System Scaffolding
Surface Treatment: Powder Coating
Reusability: Yes
Safety: High
Flexibility: High
Color: Steel, Painted Color
Ladder Frame: Yes, for Frame System Structuring

Technical Parameters:

Parameter	Description
Flexibility	High
Cost-effectiveness	Yes
Safety	High
Surface Treatment	Powder Coating
Stability	High
Size	Customized
Color	Steel, Painted Color
Reusability	Yes
Material	Steel
Durability	High
Application	Scaffolding System for Construction, Scaffolding Frame System, H Scaffold System

Applications:

Bythai BT04 Frame System Scaffolding

Bythai BT04 Frame System Scaffolding is a perfect combination of h frame and ladder frame structures that offer an efficient and cost-effective solution for construction projects. It features a high load bearing capacity, high durability, excellent safety, and reusability. In addition, it is highly cost-effective, making it the perfect choice for applications such as scaffolding, formworks, and temporary structures. These features make Bythai BT04 Frame System Scaffolding the ideal choice for any construction project, as it ensures that the job is done efficiently, safely, and with minimal cost. The high load capacity, durability, and safety of the frame system make it ideal for any kind of scaffolding, formwork, or temporary structure, while the reusability ensures that the product can be used for multiple projects.
Bythai BT04 Frame System Scaffolding is the ideal choice for any construction project due to its high load capacity, durability, safety, reusability, and cost-effectiveness. With this product, you can be sure that your construction project will be completed efficiently, safely, and cost-effectively.

Customization:

Bythai BT04 Scaffold Mobile Frame System

This scaffold mobile frame system is made from high-quality materials, offering you superior durability and stability. It is lightweight, making it easy to move and transport. It is also cost-effective and can be customized to fit your needs. The Bythai BT04 Scaffold System is an excellent walk-through scaffold system that provides maximum safety and efficiency.

Support and Services:

We provide technical support and services for Frame System Scaffolding. Our technical support team has a range of experts who are available to answer any questions you may have about the product. We also provide ongoing maintenance and monitoring services to ensure the system runs optimally. Our team is trained in the latest technologies and can provide custom solutions to any issues you may have. We strive to provide the best customer service and support to our customers so that they can have the best experience with our product.
